Halloween 5   Enhance the home page formatting

In this exercise, you'll use the CSS box model to add spacing, borders, and backgrounds to the Halloween Store home page that you formatted in exercise 4. When you're through, the page should look similar to this:

Specifications

- Format the body of the page so it's 800 pixels wide, has a white background, has a black border with a shadow, and is centered in the browser window.

- Add a background image behind the body of the page that uses the bats.gif file in the images folder. This image should repeat both horizontally and vertically.

- Add a black border below the header and above the footer.

- Remove the shadow, italics, and color from the first heading in the header.

- Add a 45-degree gradient to the header and footer. The gradient in the header should range from white at the left to orange ¾ of the way to the right to black at the right. The gradient in the footer should be the reverse. Be sure to provide for all modern browsers.

- Adjust the margins and padding for the elements on the page so it looks as shown above.
